SUMMARY

BCA graduate and Arena Animation trained designer who builds fast, responsive websites and designs clean interfaces. I take an idea from a Figma wireframe to a live page on my own, and my graphic design and motion background helps me get typography, colour and layout right. Looking for an entry-level role or internship.

PROJECTS

SmartDine — QR Restaurant Ordering

- Customers scan a table QR code to open a 50-dish menu, then search, filter, pay and track the order live.
- Kitchen, billing and admin dashboards with pricing rules (10% off above ₹500, 5% GST) and printable QR cards for each table.

NeonStream — Movie Streaming Website

- Movie listings, title search and detail pages, along with login, subscription-plan and payment pages.

Eternal Games — Game Store Website

- Game store built with AngularJS: 16 games across 8 genres, with filters by genre, platform, year and rating, plus sorting and "load more".
- Game detail view with trailer, a wishlist that stays saved after closing the tab, and a gamer profile with XP level and badges.

Wanderlust Co. — Travel Website

- Destination and tour-package sections, a trip search form with date and guest validation, and a trip enquiry form.

Motion & Graphic Design

- Showreel with title animation, countdown timer, logo reveal, light text effect and motion tracking on live footage.
- Fan trailer (Naruto Shippuden footage) edited in Premiere Pro: sound design, SFX, audio mixing, music sync and title cards.
- Social media posts and web banners for food, product, education and agency brands.
